

Kamino Cyber Security Services

Who's looking after the cyber security of your business?

In a digital world where a cyber security breach can destroy a business overnight, Kamino wants to ensure that businesses of all sizes have the means to protect their data and systems.

Feeling concerned? We understand. In fact, that is exactly why we decided to launch Kamino.

You have enough to deal with. Let us deal with this on your behalf.

BUSINESS SECURITY IN A DIGITAL WORLD

Our services

Small to medium sized advice businesses often don't have the resources or time to allocate to cyber security. Our services are specifically tailored for you, to alleviate your security concerns.

We provide independent cyber security advice and packages at a very affordable price point.

Our services include

- Initial threat assessments
- 24 hour monitoring of your systems and devices
- Staff education
- Penetration tests
- Incident response

If you have any questions regarding how Kamino can help protect your business, or just don't know where to start when it comes to keeping you and your clients' data safe, get in touch with us at info@kamino.com.au or on 1300 882 938. We'd love to have a chat with you.

Midwinter's AdviceOS

Brilliantly simple advice technology

AdviceOS has been designed to take the complexity out of financial advice generation. It's simple to use and fully configurable – giving you the ability to build your own tailored package of modules and templates in line with the individual needs of your business. It offers a range of intuitive and highly sophisticated advice modelling tools which simplify the advice process whilst allowing you to provide your clients with quality advice, quickly and cost effectively.

API - Advisers need systems that can speak to each other

Midwinter has invested significantly in the area of software integration in order to allow third party service providers to easily integrate with AdviceOS. This allows the various software systems utilized by planners to speak to each other with ease – avoiding double entry of data and saving time spent carrying out back office tasks.

- * We envision AdviceOS as being the central hub in a planner's business, seamlessly integrating with other applications via open API.

Features and capabilities

- * Complete CRM – file notes, document storage, workflows, campaigns, fact find
- * Opt-in, FDS, commission feeds and insurance management
- * Best in market product and platform comparison and projections
- * Cashflow and capital for full and scaled advice modelling with SoA generation
- * Online fact find via a secure a client portal (for both client and adviser)
- * Online engagement calculators that are shared between client and adviser
- * Licensee compliance monitoring of authorised representatives as well as centralised control of settings and user management
- * Integration with other solution providers such as Xero, Practifi, ClassSuper
- * Accounting modules for unlicensed, limited and full licensed accountants
- * Digital Advice (advice delivered online) – providing your clients and potential clients with a low touch, scalable form of engaging with you and their finances
